contact us

- **You are:**
 - A good professional in your business segment but you are not familiar with the nuclear AREVA context
 - A manager or a key team member for AREVA projects in your company
- **You would like to:**
 - Become a long-term AREVA subcontractor
 - Better understand the key factors of a nuclear project
 - Improve your understanding of Quality, Safety & Procurement requirements
 - Improve your follow-up & efficiency of your projects
- **You will:**
 - Discover the Safety culture basics
 - Understand the nuclear Quality specificities
 - Grasp the management, the volume & the content of the requested documentation
 - Strengthen your own project management as well as your subs management due to the AREVA requirements
- **What's more:**
 - Pedagogical cases based on actual events
 - A full concrete example helps trainees to go through the main relevant topics related to Quality, Safety & Project Management
 - To encourage constructive exchanges is our challenge for a long-term future with you

This awareness program provides an overview of the nuclear projects context while focusing on the nuclear specificities related to Quality, Safety and AREVA Project Management
